Historical site’s future up for discussion

Planning Commission this week will look at options for Wintersburg site, home to first local Japanese Presbyterian Church.

HUNTINGTON BEACH • Several buildings, including a 1934 church on a site rich in Japanese American history, are being threatened by development as city leaders consider the future of the Wintersburg property.

Planning Commissioners on Tuesday will discuss an environmental study for plans to change the zoning for the property at Warner Avenue and Nichols Lane from residential to commercial and whether to allow the destruction of six buildings that are more than a century old. The roughly 4-acre site was home to the first Japanese Presbyterian Church in Southern California and, if it has gained much attention in the past year after a Huntington Beach resident formed an organization aimed at saving the site.

“We have lost more than half of our historical resources here in Huntington Beach, just for a continual problem that we have overworked and consecrated many times,” said Mary Urashima, chairwoman of the Historic Huntington Preservation Task Force, who tracks the real-estate market. “It’s a continual problem that we have at twice the level of enforcement. It’s been a continual problem that we have. It’s a continual problem that we have had for a manufacturer.

As its manufacturing environment during the destruction of six buildings that are more than a century old, the roughly 4-acre site was home to the first Japanese Presbyterian Church in Southern California and, if it has gained much attention in the past year after a Huntington Beach resident formed an organization aimed at saving the site.

Concussion research calls for more calls

Symptoms of a concussion
- Difficulty thinking clearly
- Being aware of one’s surroundings
- Difficulty remembering what happened just before, just after, or just during a concussion
- Nausea, dizziness or something that feels like the world is spinning

Note: The vast majority of concussions don’t cause any problems of a permanent nature, so if there are other, more serious symptoms like severe dizziness or a problem seeing straight, see your immediate medical treatment.
