Bill Maurer was recently appointed dean of UC Irvine’s School of Social Sciences, the largest academic unit on campus.

As an anthropology grad student at Stanford University, he wrote his dissertation on tax havens economies in the British Virgin Islands. His research was the tipping point into a lifelong career studying the evolution of currency, economies and social constructs associated with wealth and finance.

Maurer believes the social sciences can provide endless possibilities for students with just about any interest, making it a popular choice at UC Irvine. “Social Sciences is a huge shop,” he said. “We have more undergrads than anyone else (at UC Irvine) and we really serve the campus and the community by training so many students in analytical skills, quantitative skills and writing skills.”

First recipient of LGBT scholarship named

In law school, Jordan Aiken plans to focus on inclusion.

First-year UC Irvine law student Jordan Aiken is the first recipient of the M. Katherine Baird Darmer Equality Scholarship. The $5,000 scholarship recognizes a law student affiliated with the Orange County Coalition and private donors.

Alumnus of Social Sciences

The new dean of UC Irvine’s largest school hopes to put it in the spotlight and promote more research by its students.

When students consider studying social sciences, career aspirations like social worker and sociologist often come to mind. But Bill Maurer, newly appointed dean for UC Irvine’s School of Social Sciences, is an expert on money.

Maurer’s expertise in money didn’t stem from a desire to be wealthy. Instead, it was born out of a longing to understand people and the societies they create, he said.

**TREATMENT**

**TIMING**

The severity of hair loss from radiation treatment is linked to the time of day treatment is administered, according to a study by UC Irvine, USC and Salk Institute researchers. The findings, tested on mice, could play a significant role in radiation treatment protocols and may have implications for other side effects of cancer treatments, such as ulcers and suppressed immune systems.

The School of Social Sciences is the largest academic unit on campus, with more than 4000 students and 750 tenured faculty. Although UC Irvine offers many traditional sciences, technology, engineering, and mathematics programs, the School of Social Sciences serves as an alternative, enriching and complementing many student’s undergraduate research and a variety of career paths.

“With the growth of social sciences, we are now in a position to provide a better understanding of the world. We are able to engage with the world in a way that is not available through the social sciences,” said Maurer. “We’re getting to a point where we can use the tools of the social sciences to understand the world. We’re starting to see the potential of the social sciences to make a difference.”

UC Irvine’s School of Social Sciences has a long history of innovation and excellence, and is committed to providing students with a world-class education. With more than 5000 students and 150 full-time faculty, the School of Social Sciences is one of the largest and most respected academic units on campus. It offers a wide range of majors and programs, including anthropology, political science, history, and more. The School of Social Sciences is dedicated to preparing students for success in a variety of fields, from law and business to public policy and social work. With its commitment to excellence and innovation, the School of Social Sciences is poised to continue its tradition of excellence and success for many years to come.

UC Irvine alumna Katie Ellis, Opus Community Foundation executive director, makes community service her business

Many graduates of UC Irvine’s MPA program have gone on to work for the city of Los Angeles, said Ellis, who received the Lauds and Laurels award in 2011. Ellis said that the program has helped many students achieve their career goals.

“I always tell my students that the program at UC Irvine is the best in the country,” Ellis said. “It’s a great program that helps students get the skills and experience they need to succeed in their careers.”
