Announcing the UCI Law Spring 2020

Artificial Intelligence & Law

COLLOQUIUM SERIES

Machine learning and automated decision-making technologies (colloquially dubbed "artificial intelligence" or "AI") are an increasingly integral feature of social systems. These technologies raise novel legal questions regarding oversight, individual rights, liability and justice. The UCI Law Colloquium on AI & Law, led by Chancellor's Professor of Law Dan Burk, brings to campus leading thinkers engaged with these issues.

Let's Go Change the World.

UCI Law

January 13

Margaret Hu
Associate Professor of Law,
Washington & Lee University School of Law

"Algorithmic Jim Crow"

UCI Law

University of California, Irvine School of Law
401 E. Peltason Drive, Suite 1000
Irvine, CA 92697-8000

Technology, Society and Justice

Rapidly developing technologies are outpacing the law and raising profound ethical challenges. At UCI Law, our faculty of top scholars work in an interdisciplinary fashion to ensure that law, policy and ethics keep up with technological changes, and to lead the development of practical legal and policy solutions that our world needs today.

▶ **We invite you to join the discussion in person or via livestream from 12:00-2:00 p.m. PT. These events are pending approval of Minimum Continuing Legal Education Credit by the State Bar of California. UC Irvine School of Law is a State Bar-approved provider. Details including full abstracts and speaker bios are available at www.law.uci.edu/AIColloquium. To RSVP, contact Rabie Kadri at centers@law.uci.edu.**
